

### Manage Your Data Easily

Administration is easy with the Ingress software application. Ingress allows you to remotely manage door activity of all connected terminals, while containing time attendance functions for attendance monitoring.

#### Track Movement of Staff

By installing an exit slave reader instead of a push button, the management will find it easier to track the movement of staff, as verification is needed even when exiting the premises.

#### **Versatility Assured**

The i-Kadex and k-Kadex come with a Wiegand 26-bit output, which means it can connect to most external controllers without hassles.

#### Waterproof

The quality of the i-Kadex and k-Kadex is impeccable, being IP65 rated, which means that it is not only dustproof, but water resistant as well.

# Touch Keypad

The smooth surface of the k-Kadex is equipped with a unique touch keypad providing you with a touch of class.

# Flexible Integration

Although being primarily a card reader, the i-Kadex and k-Kadex can also connect to other fingerprint and face recognition master terminals as an exit slave reader.

## Third Party Controller

The i-Kadex and k-Kadex can be integrated with a FingerTec master terminal or it can be connected with an ingressus controller or third party controller to function as a master terminal

# Value for Money

Mix and match the terminals with either the m-Kadex or Kadex to give you more value for your money.
